

Front right adapter Ducato

Step 1:

Put the adapter on the frame approximately under the cab seats, most rear possible, if necessary remove any sealing material for a perfect adherence, use a bottle jack to stop the bracket in the correct position and make the 8mm side hole then fix with the bolt.

Step 2:

Apply the clamp

**JACK WITH MOTOR TO THE OUTSIDE OF THE VEHICLE AND
ROTATION FRONT**

Front left adapter Ducato

Step 1 - 2: Use the same procedure of the right adapter

Step 3:

In rare cases it may be necessary to grind, for a correct position of the adapter

**JACK WITH MOTOR TO THE OUTSIDE OF THE VEHICLE AND
ROTATION FRONT**

Rear adapter Ducato

Step 1:

The rear adapter must be placed before the rear axle

Make the 10mm hole then fix with the bolt.

Rear adapter Ducato 244

Step 2:

**BOTH REAR JACKS WITH ENGINE TO THE REAR OF THE VEHICLE
AND INSIDE ROTATION**
